MEL ELFIN

Editor, Special Projects U.S. News & World Report

Executive Editor, Guide to America's Best Colleges

Veteran Washington newsman Mel Elfin, who served as *Newsweek's* bureau chief in the nation's capital for almost two decades, now is executive editor of *U.S. News and World Report's* "Guide to America's Best Colleges."

Elfin, who has participated in the coverage of almost all the major news events of the past three decades, has served as editor, Special Projects, at *U.S. News & World Report*, since 1986. He also writes the magazine's popular "Washington Whisper" feature.

Before joining *U.S. News*, Elfin was with *Newsweek* for 28 years.

Elfin has had private interviews with each of the seven most recent U.S. presidents. His most memorable interview was with Lyndon Johnson, the week riots hit Detroit in the summer of 1967. They were the worst race riots in U.S. history, killing 43 people and causing about \$200 million in damage over five days of violence. LBJ and Michigan Governor George Romney were in a dispute over calling out the National Guard.

"I came to the White House for a briefing," Elfin said, "and it was just LBJ and me. I was with the president for 90 minutes. He wanted to tell the world through the pages of my magazine why he was right and Romney was wrong.

"At the end of the session," Elfin added, "he slapped me on the knee and with a baleful eye said to me, 'I've got Vietnam, crime on the streets, and those blankety blanks

on Capitol Hill. Now I'm in a dispute with Romney.'

"The lesson I learned," Elfin said, "was that the most powerful man in the world—the person who could order World War III for breakfast—was having a bad day. It proved to me the president of the United States is just as subject to good fortune or a lack of it as anyone. Every president has their bad days. I've never forgotten that as a Washington journalist. One problem with today's journalism is that we build up the president into a superman."

In 1972, Elfin was among a handful of journalists who accompanied President Richard Nixon on his diplomatic groundbreaking trips to the People's Republic of China (PRC) and the Soviet Union.

Recalling Nixon's trip to the PRC, Elfin said: "To me and my colleagues who went to China, it was so strange that it was like walking on the other side of the moon since China had been absolutely locked away for most Americans. A senior correspondent in my bureau—a sophisticated foreign correspondent—asked me to bring him anything from China, even a rock."

Elfin's "most important moment watching the presidency" came in August, 1974, after Richard Nixon's resignation, when Gerald Ford became the nation's first unelected chief executive. "We were in the East Room of the White House and the Marine Corps band was playing 'Hail to the Chief.' Everyone stood up—no one was plotting revenge to upset the new government. The true test of a democracy is how it transfers power and in our most important test since the Civil War, we passed."

Born and raised in New York City, Elfin graduated magna cum laude from Syracuse University in 1951. He received a master of arts degree in history from Harvard in 1952.

Elfin served as an intelligence officer in the Strategic Air Command, a unit of the U.S. Air Force, during the Korean War. After discharge from the military, he completed credits toward a doctoral degree at the New School in New York City.

He began his career in journalism at the *Long Island Daily Press*, where he served as assistant city editor.

While at the *Press*, Elfin won a 1957 George Polk Award for a series of stories leading to a legislative crackdown on a racket in second mortgages.

Academic Colors and Regalia

Like judicial robes, the garments worn on academic occasions such as today's Commencement derive from the ecclesiastical garb of medieval England. The scholar in the Middles Ages, it must be remembered, was a clerk, and therefore required to wear the clerical gown and tonsure. Certainly, at Oxford and Cambridge, at least in the earliest times, the robes were monastic in origin, although the hood was adapted from a lay garment common to both sexes and all classes.

As early as the fourteenth Century, scholars of certain colleges were required by statute to wear "a decent habit" befitting a clerk and no evidence appears that there was much differentiation among undergraduates, bachelor's, master's and doctoral robes. All were black, commonly of lamb's wool; most were fur-lined for warmth, or at least fur trimmed; and the only mark of difference was in the fuller cut and ankle length of the master's gown. The cope, or closed cape, was also black and followed the style of the everyday mantle of the clergy.

Hoods were worn by all and probably had no academical significance at the beginning. By 1330-40 doctors began to adopt scarlet for their hoods, and by 1500, for their robes, with black retained by the masters of arts and bachelors of divinity. An act of Henry VIII in 1533 ratified the wearing of robes of other colors. Hoods were lined with silk and miniver fur, a custom surviving until the late seventeenth Century, but over the years distinctions were created to identify the various ranks and faculties.

Caps evolved in similar manner. The round velvet cap is still worn today in the full dress of doctors (except doctors in theology); the familiar square, or mortar-board, was copied in the early sixteenth Century from the thirteenth Century cap of the University of Paris. A third style also derives from Paris: a squared cap made by sewing four pieces of cloth with seams producing ridged edges, seen in modern times in the biretta of the clergy and the squared velvet cap of doctors of theology. The "who" and "how" of the wearing of caps produced numerous rulings, restrictions and change.

The Reformation repressed the brilliant silks, gold lace, costly furs and extravagant cut of academic robes, and the sober and more uniform styles are, for the most part, what we see today.

However, the growth of higher education in the United States during the nineteenth Century, when the great land grant colleges and universities were established under the Morrill Act, created a confusion of conflicting styles and colors, The easy identification of one's academic status by means of cut, fabric and color was no longer true.

In 1893 an intercollegiate commission presented a uniform code for caps, gowns and hoods to be worn in the United States. The mortarboard caps are the same for doctoral, master's and baccalaureate degrees, except that doctors' caps may be of velvet and may have a gold tassel. The bachelor's gown is marked by pointed sleeves, reaching to the knee, while the master's sleeve is squared at the ends, and longer. The doctoral robe is fullest, with rounded bell shaped sleeves marked by three velvet stripes.

The greatest symbolism of the academic costume is borne by the hood, which identifies the level of the degree, the faculty (or department of learning) in which it was earned, and the institution which awarded it. The size of the hood, its shape and the width of its velvet trim identify the level of the degree, with doctoral hoods naturally being the fullest, widest and longest. Faculty colors tell us the department. Today's graduates will be wearing white for the College of Liberal Arts, pink for the

School of Music, golden yellow for the sciences and brown for the fine arts. Faculty members in the processional may be wearing light blue for education, copper for economics, drab for business and accountancy, orange for engineering, purple for law, lemon for library science, green for medicine, apricot for nursing, dark blue for philosophy, sage green for physical sciences, cream for social sciences and scarlet for theology, among the many available. The colors are mandatory on hoods, but may also be used on the tassels and/or the velvet on doctoral gowns.

The university or college is usually identified by the color of the hood lining. Two colors are frequently used, since there are approximately 2,000 degree-granting institutions in the United States. A few, such as Harvard, Yale, Princeton and the University of Chicago, use a single color. Illinois Wesleyan's green and white was adopted in 1888.

The Illinois Wesleyan University Mace, first carried at the 1969 inauguration of Dr. Robert S. Eckley as fifteenth president of the University, is also a striking symbol of the institution. Made of bronze for power and endurance and of walnut for organic strength, its cupola represents the bell tower of Old North Hall, Illinois Wesleyan's first building, which was erected in 1856 and demolished in 1967 to make way for Sheean Library. The bell suggests the Hedding Bell, a campus landmark since 1931, when it was installed on the IWU campus after pealing for generations at Hedding College, now defunct. The staff of the Mace is made from the walnut of Old North Hall, and the names of Illinois Wesleyan's presidents are engraved on its bronze base.

AND COM

Prior to and during the Commencement ceremony, the Illinois Wesleyan National Alumni Association will sponsor a hospitality tent serving complimentary beverages. The tent is located on the east side of the Quadrangle in front of Holmes Hall. A first-aid station is located in the tent. In the Shirk Center, these services will be available in the lobby.

On the Quadrangle, restrooms are located on the first floor of following buildings: Shaw Hall, Memorial Student Center and Holmes Hall. In the Shirk Center, the restrooms are located to the north of the main lobby.

Following the ceremony, you are invited to a short reception in the tents on the south and west sides of the Quadrangle. If the ceremony is in the Shirk Center, the reception will be in the Activity Center.

Music will be provided by the Active Ingredient Jazz Quintet.
