Additional Information

- Graduates reported employment in 21 states and in 4 locations outside of the United States: Egypt, China, Kosovo, and Zambia.
- Graduates reported graduate/professional school in 19 states and in 1 location outside of the United States: Canada.
- The global pandemic resulted in some students reporting that employment offers were rescinded or start dates were adjusted; this potentially accounts for the increase in part-time employment.
- A decrease in the number of students reporting graduate/professional school enrollment may be attributed to uncertainties surrounding the pandemic, financial concerns regarding accruing additional debt, and an increase in students delaying further education to gain work experience.
