Honors Convocation

Student and Faculty Honors 2020

*This program is dedicated to the Class of 2020
and
to students who have earned scholastic and activity honors*

Tim Rettich
Professor of Chemistry

Recipient of The Kemp Foundation Award for Teaching Excellence — 2020

“A Grain of Salt”

<https://www.youtube.com/watch?reload=9&v=YvKjT1MeFnc&feature=youtu.be>

Professor of Chemistry Timothy Rettich joined Illinois Wesleyan University as an assistant professor in 1981. He was promoted to associate professor in 1987, and to professor in 2004.

Rettich's general area of interest is physical chemistry, especially thermodynamics and kinetics, with a focus on gas-liquid exchanges including gas liquid solubility, solution thermodynamics, and condensed phase photochemical kinetics. Along with teaching introductory General Chemistry at Illinois Wesleyan, Rettich also teaches upper-level Physical Chemistry I (Thermodynamics) and Physical Chemistry II (Kinetics).

Photochemical smog, greenhouse gases, and ozone depletion are common examples of environmental problems that involve Rettich's area of research, which has been widely published. According to Rettich, understanding the nature of these problems is the first step toward finding a solution. Previous collaborative work done by Rettich and students has focused on photochemical reactions of nitrous acid in the presence of radical scavengers.

Rettich earned a bachelor's degree from the University of Dayton and a Ph.D. in Physical Chemistry from Case Western Reserve University.

Faculty Retirements

R. Kent Cook
Professor
School of Music

Professor R. Kent Cook joined the faculty of the Illinois Wesleyan University School of Music in 1999. Over the past 21 years, he has taught piano, music theory, music history, and the occasional Gateway course. He served as Head of the Piano Department from 2008 until 2018, and he has been a leader on committees in the School of Music and in the University at large.

Dr. Cook's piano students have gone on to a variety of careers in music, music education, musicology, even medicine and engineering. He remains in close contact with many of his former students, and he is extremely proud of all of their accomplishments. As a performer, Dr. Cook maintains a busy schedule as soloist and chamber musician. He has given recitals throughout the United States and in many European venues, with recent performances in Austria, Bulgaria, Czech Republic, France, Germany, England, and Italy. Following his retirement from IWU, he plans to continue with an active concert schedule, and he hopes to pursue research into some lesser-known piano composers from the late 19th and early 20th centuries. Professor Cook is extremely grateful to faculty, staff, and students at Illinois Wesleyan University for all of the support and inspiration over the past 21 years.

Linda French
Professor
Physics Department

Dr. Linda French, Professor of Physics, is retiring from IWU after 18 years of service. Her scientific research, funded by the National Science Foundation, concerns the study of the shapes and surfaces of asteroids and comets. She has been a frequent guest observer at Lowell Observatory in Arizona and at Cerro Tololo Interamerican Observatory in Chile, and was often accompanied by students on these research trips.

During her sabbatical in 2009-2010, Dr. French was a Visiting Professor of Physics at the University of York, England where she investigated the life of York astronomer John Goodricke (1764-1786). She has given lectures on Goodricke and his mentor Edward Pigott in York, Boston, and Toronto, and at major observatories in the United States and Chile.

In February of this year, French was named to the inaugural class of American Astronomical Society (AAS) Fellows in recognition of her contributions toward the AAS mission of enhancing and sharing humanity's scientific understanding of the universe.

"I was both honored and humbled to be named a Fellow of the American Astronomical Society," French said. "My work as a professor at a small university has involved teaching, mentoring students, and service to the IWU community and beyond, as well as research. It is the combination of all these aspects of professional life that I have found most rewarding in my career, and it is doubly rewarding to be recognized for them."

For the past three years, French served as Program Director at the National Science Foundation (NSF) Division for Astronomical Sciences where she was responsible for the CAREER program, a highly-prestigious five-year grant for young tenure-track scientists. French's additional work with the NSF included organizing panels for review of research proposals, recruiting panelists, running the panels, and then, evaluating and passing on the panels' recommendations for funding. French was also responsible for programs in planetary and stellar astronomy research and in astronomy education.

French joined Illinois Wesleyan's faculty in 2002 and was promoted to Professor of Physics in 2008. In 2016, she earned the Kemp Foundation Award for Teaching Excellence, the University's highest teaching honor.

A native of Hagerstown, Indiana, French earned a bachelor's degree in astronomy from Indiana University and a master's and Ph.D. from Cornell University. She also did post-doctoral work at Massachusetts Institute of Technology.

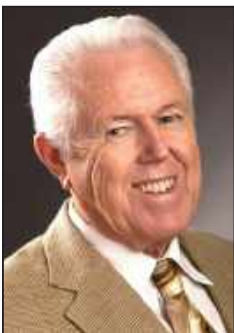

Roger Garrett, B.M., M.M

*Assistant Professor
School of Music*

I was hired at IWU during the spring of 1988. Still in the middle of a Ph.D. degree at the University of Michigan, my wife was expecting our first born, and I was looking at another year before the degree would be completed. I received a call from Thomas

Streeter, Chair of the then Instrumental Division in the SoM, and subsequently I agreed to a performing, conducting, and teaching interview. Upon my arrival in the fall of that year, I found only two clarinet majors and one non-major taking clarinet lessons. My concert band had only 19 students, and I was assigned Titan Band and the Fundamentals of Conducting course. Ironically, I had never taught conducting before! Ten years later, the Concert band had 92 students in it, the conducting classes had been split into three sections during the year, I had over 20 clarinet students studying in the clarinet studio, and I was teaching Marching Band Practicum and heading up the self-created Recording Services division that is still called "The Recording Studio." Titan Band was still a big part of the assigned "voluntary" work. We hit the new millennium firing on all cylinders!

Flash forward to now, and I am very pleased with many of the things that occurred at IWU while I was there. Eight years of Car Shows on the Quad during homecoming (at one point we had 160 classic restored and modified cars!), over ten concerto aria winners in clarinet, an auditioned second wind ensemble, two compact disc recordings, multiple publications, performing in, at one point, three professional orchestras and two chamber orchestras, and frequent solo appearances. During this time, I was fortunate to perform with YoYo Ma, Emanuel Ax, Dudley Moore, Itzhak Perlman, Bobby McFerrin, and Joshua Bell (to name a few). Over my 32 years at IWU, my wife Sara (a cellist and string educator in District 87) and I brought up two terrific sons, Phil and Peter, have provided a home to six dogs (two of whom are currently with us – border collies Linus and Archie), built a home in Bloomington that contains a woodworking shop, explored the state of Iowa on bicycles by riding across it three times (RAGBRAI), cycled the Seattle-Portland two day ride twice, and I have learned to love (and at times hate) the game of golf. I've established a small business that will continue, and I will continue to perform with the Peoria Symphony Orchestra as principal clarinetist until I can no longer play – or they ask me to stop – whichever comes first!

Melvyn Jeter

*Professor
Mathematics Department*

Mathematics professor Melvyn Jeter's research interests include convexity, linear algebra, mathematical programming, and linear complementarity theory. Professor Jeter is retiring after thirty-four years of service to IWU.

Vadim Mazo
Associate Professor
School of Music

Mr. Vadim Mazo has pursued a career as a teacher, soloist, chamber musician, and conductor. Presently he is an Associate Professor of Violin and Viola at Illinois Wesleyan University. Mr. Mazo studied at the Byelorussian State Conservatory in Minsk with Michael Goldstein, a student of Pyotr Stoliasky. From 1968 to 1980, he was a soloist with the Byelorussian Philharmonic and performed with the Minsk Chamber Orchestra and the Byelorussian Symphony Orchestra. He performed on radio, television, and with performance tours throughout the former Soviet Union with such international artists as O. Kagan, M. Rostropovich, and M. Shostakovich, among others. He immigrated to the United States in 1980, and before coming to Illinois Wesleyan University, Mr. Mazo collaborated with the Fine Arts Quartet and held teaching positions at the Wisconsin Conservatory of Music, the University of Wisconsin at Green Bay, and the University of Evansville.

Professor Mazo is a devoted teacher. As a pedagogue, his teaching activities have taken him many places around the world. He has been invited to present master classes everywhere from American music schools such as Northwestern University, Lawrence University, the Universities of Kansas, Illinois, Wisconsin, and Long Beach California to Greece, Spain, the Czech Republic, Japan, England, Germany, Canada, the Conservatoire Superior in Paris, and elsewhere in France. More recently he has conducted master classes in Thailand, Taiwan, the Philippines, China, Hong Kong, Russia, and Byelorussia. As a member of the faculty and as a performer, he participated in the Boccherini and Mozart-issimo festivals in Madrid, the Mozart in Monterey festival, the Southeastern Music Center, the B. Martinu festival in Prague, and the Interlochen Chamber Music Conference. He has also collaborated as a conductor and soloist with the Suk Chamber Orchestra in the Prague Spring Festival and Virtuosi di Praga, and most recently with the Manila Symphony Orchestra. Professor Mazo is an active performer as a violinist, violist, and chamber musician, featured in a Carnegie Recital Hall (a 1992 program, "Homage to Shostakovich") and many various concert venues on a regular basis in the USA, Europe and Asia. Since December 2012, Professor Mazo has been appointed guest professor at Sichuan Central Conservatory of Music in Chengdu, China.

Michael Seeberg
Robert S. Eckley Distinguished Professor of Economics
Economics Department

Michael (Mike) Seeberg started his career at Illinois Wesleyan University in 1989 as the Robert S. Eckley Distinguished Professor of Economics in 1989 after 14 years in the economics department at Ball State University. He chaired the Illinois Wesleyan University economics department for 10 years and also chaired a number of university committees. He enjoys teaching, doing research, and mentoring student research. To date, Mike has chaired 56 successful research honors projects and supervised 4 student summer research projects. He is faculty advisor to a unique online undergraduate journal that is published at IWU (*The Undergraduate Journal of Economics*) and founder of two other undergraduate journals (*Park Place Economist* and *University Avenue Undergraduate Journal of Economics*). He has taken students on numerous field trips, including trips to professional conferences and trips to Chicago to explore issues of poverty, discrimination, and immigration.

Mike is the author of numerous articles in labor economics with a recent focus on the economics of immigration. Most of his articles are co-authored with IWU alumni. He also is author of a number of pedagogy papers on capstone senior seminar courses and on the use of undergraduate journals to promote higher quality student research. In his spare time, he enjoys travel and competing in triathlon and other multisport events.

David Vayo

*Fern Rosetta Sherff Professor of Composition and Theory
School of Music*

Under Vayo's stewardship, IWU came to have one of the nation's leading music-composition programs based at a liberal-arts school, with alumni going on to careers in fields such as university teaching, music production, music publishing, church music, popular music, orchestra management and contemporary-music performance. Vayo revised the Bachelor of Music in Composition degree, developed the Concentration in Music Composition and the Honors designation in Music Composition, shepherded the growth of the School of Music's computer facilities, and introduced courses in free improvisation, contemporary music and Latin American music. Expanding on the legacy of the Symposium of Contemporary Music, Vayo developed the IWU New Music Series, hosting over 150 guest composers and performers from four continents and participating frequently in Series concerts as a pianist and keyboardist.

During his time at IWU Vayo wrote eighty-one musical compositions; received fellowships and commissions from the John Simon Guggenheim Memorial Foundation (to date the only Guggenheim awarded to an IWU faculty member), the Koussevitzky Music Foundations in the Library of Congress, the Barlow Endowment for Music Composition, and the Illinois Arts Council; took part in fifteen artist residencies in the US and Canada; traveled to many of the hundreds of performances of his music that took place in the USA and eighteen other countries; and became one of the few western composers to write extensively for traditional Chinese and Japanese instruments. In retirement, Vayo plans to continue developing himself as a composer and performer, and to explore the roles that a creative artist can play in a local community.
