Poster Presentation 2

PAST, PRESENT AND FUTURE GROWTH OF INTEL
CORPORATION

Tina Beaird, Sridhar Veerapaneni and Zhenhu Jin*,
Department of Business, IWU

Created in 1968, Intel Corporation designs, develops, manufactures and markets advanced microcomputer components. It became the world's largest manufacturer of semiconductors in 1992 and its microprocessing chips are currently used in 80% of the world's personal computers. In the past decade Intel's growth has been remarkable. Whether this growth will continue due to numerous changes in the market remains to be seen. Intel's growth in many areas will be analyzed and predictions made about the company's future growth.
