Illinois Wesleyan Math Contest

Prairie Central High School Wins Three Awards

BLOOMINGTON, Ill.--Prairie Central High School of Fairbury won three awards at the first annual math contest for 9th to 12th graders, sponsored by the Illinois Wesleyan University Mathematics Society, a student group.

Awards won by Prairie Central were:

- Jeff Stoller won second place in the freshmen division.
- Jenny Ifft placed in the top 20 percent of freshmen competing in the contest.
- David Lowery won third place in the sophomore division.

Prairie Central High School is located at 411 N. Seventh St., Fairbury, Ill.

IWU President Minor Myers, jr., handed out awards to winners in various categories at a post-test ceremony that followed a pizza luncheon.

Michael A. Votava, a sophomore math major from Bradford, Ill., who developed the test questions and obtained copyrights and permissions for various math problems from various authors and publishers, told the students at the awards ceremony:

"Do you want to be part of the future? Well, I've got news for you. Math is everywhere. You can't escape it. But before you can see the applications of math in college, you've got to have down the basics from high school. We designed the tests hoping to show you a glimpse of math at work and a few of the places where math is applied in our universe. Math is in computer science . . . Math's in biology, too . . . I wish I had time to tell you about the millions of mathematics applications that exist in the college curriculum."

Kara Rocheleau, a senior majoring in mathematics and economics from Minneapolis, chaired the five-person group, which worked for a year planning the event.

"First and foremost," Rocheleau said on the eve of the contest, "the high school students participating in the contest will get a taste of math competition. One thing we're aiming for is to get students to realize the various applications of math. The test will have applications on it--not just math theory."

Upwards of 200 high school freshmen through seniors from 11 central Illinois high schools participated in the Feb. 25 contest organized by the 40-member IWU Mathematics

IWU Math Contest-Prairie Central/2

Society, founded in 1992.

The high school freshmen and sophomores took an exam geared toward algebra and geometry. The test for the high school juniors and seniors was oriented more toward math at the pre-calculus and calculus levels. Each exam had 30 multiple choice questions; students were given 60 minutes to finish the exam. One non-multiple choice problem was on each exam to be used as a tie breaker. Although freshmen and sophomores took the same test, they were graded separately, as was the case with juniors and seniors.

Students from these Illinois high schools participated in the math contest: Canton; Central Catholic (Bloomington); Fieldcrest (Minonk); Marquette (Ottawa); Metamora; Normal Community; Prairie Central (Fairbury); Sacred Heart-Griffin (Springfield); Springfield Lutheran; St. Teresa (Decatur); and University High (Normal).

IWU, founded in 1850, enrolls about 1,800 students in a College of Liberal Arts, College of Fine Arts, and a four-year professional School of Nursing. In recent years, the university's endowment has grown to more than \$92 million; a \$15 million athletics and recreation center opened in the fall of 1994; and a \$24 million science building will open in 1995. The Carnegie Commission for the Advancement of Teaching promoted Illinois Wesleyan to a "Baccalaureate I" institution in 1994, a classification that places it among 164 highly selective National Liberal Arts Colleges in the annual *U.S. News & World Report* rankings. *U.S. News* ranks IWU the second most efficient national liberal arts college--a key gauge of the campus' quality academic program and relatively reasonable cost. *Barron's Profiles of American Colleges*, another respected college guide, rated IWU "highly competitive (+)" in its latest edition. IWU's 1994 freshman class scored an average 27.9 on the ACT exam, compared to the national average of 20.7.
