Nov. 29, 1983

BLOOMINGTON, ILL.—An Engineering and Computer Science Day at Illinois Wesleyan University Saturday, Dec. 10, is expected to attract high school juniors and seniors whose career interests are in these fields.

Sponsored by the Admission Office, the program will acquaint students with opportunities in these fields and, in particular, high school and college preparation necessary to pursue such a career.

Guest speakers will be Dr. Robert E. Morley, Jr., assistant professor of electrical engineering, Washington University, St. Louis, and David Wolfe, systems engineer, General Electric Company.

At the 10:30 a.m. opening session in Memorial Student Center, Morley will talk about engineering, what it is and how a student can become an engineer, and Wolfe will talk about computer science and the education needed for that field. At 11:30 there will be a tour of the Earl Edward Sherff Hall of Science and demonstrations of experiments and equipment.

The guests will continue their discussion and answer questions about careers in these fields following lunch.

Illinois Wesleyan University offers major programs in math and computer science and a 3-2 cooperative engineering program of study in which a student attends Wesleyan for three years in preparation for two years of engineering at schools such as Northwestern, Washington University (St. Louis) and Case Western Reserve University (Cleveland).
