HEY BIG SPENDER: TESTING ALTERNATE THEORIES ON VARIANCE IN WELFARE "NATIONAL EFFORT"

Meg Bergin and Kathleen Montgomery*
Department of Political Science, Illinois Wesleyan University

Developed countries vary in their levels of social welfare expenditure or "national effort." Is this variance more a result of demographics–countries having different sized welfare-dependent populations? Or, do socio-cultural variables lead countries to have fundamentally different ideas about the government's role in alleviating poverty? This paper tests the demographic and socio-cultural schools across 16 advanced nations using data from the OECD and the World Values Survey, 1990-1993 wave.
