Poster Presentation P10

**VIRTUAL BETTA**

Lauren Carroll and Susan Anderson-Freed\*  
Department of Computer Science, Illinois Wesleyan University

My project is an interactive fish written in JavaScript and Cascading Style Sheets on the web. I drew all of the pictures needed for it and made and colored the animations. The user can choose the colors of various parts of the fish and then make the fish swim across the screen. I plan to use a poster to present the details of my project. I would like to have a computer available so that viewers will be able to try out the fish for themselves.
